

THE HERITAGE TRAIL

The Heritage Trail starts inside the main door leading from the porch. The first three stops give information about the church as a whole, then the trail leads clockwise around the church starting at 4, the font.

The plan is based on that drawn in 1927 by the surveyor from the Royal Commission for Historic Monuments of England (RCHME). It shows five openings along the north wall but they can't be seen inside as two are blocked.
