

9. THE WEST WINDOW

Above the 'vestry' in the west wall is a large window with plain glass. It was described by the RCHME surveyor as 'a late 14th-century window with three ogee trefoiled lights and geometrical tracery in a two-centred head; moulded label with two head stops (Bishops); moulded external and hollow-chamfered internal jambs.' The bishops' heads are carved as one with the lower part of the moulding. The drawing in the surveyor's notebook (above) shows the layout of the window and the design of the mouldings. Some of the diamond-shaped panes are tinged yellow or green, but this also applies to the window of the 1870s organ chamber so they are not necessarily old.
